The off label use of FDA approved medications is a well recognized and accepted medical practice as noted on the FDA website [<https://www.fda.gov/patients/learn-ab...>] allowing physicians to treat patients as they judge medically appropriate.

This off label use allows physicians to treat patients that are not responding to other treatments including SARS-CoV-2.

Today there are several instances of FDA approved drugs that are available for the treatment of SARS-CoV-2 including but not limited to the following:

Hydroxychloroquine, Primaquine, Azithromycin, Doxycycline, Clindamycin, Tocilizumab, Interferon α -2 β and Ivermectin.

The next time a physician tells you there are few or no approved treatments for SARS-CoV-2, ask him/her to look at the off label use of these drugs for the treatment of SARS-CoV-2.

Covid-19 = Certificate of Vaccine ID-AI: The Great Reset

Global Lockdown: The World Health Organization declares coronavirus pandemic on March 11, 2020.

mRNA vaccines: "The Covid-19 mRNA vaccines only have Emergency Use Approval (EUA). These clinical phase 2/3 trial stage mRNA vaccines tests aren't set to be complete until Jan 2023".

No global or national excess mortality was recorded during the corona crisis 2020.

The Covid-19 vaccine is not a vaccine. Synthetic MRNA NANO MEDICAL-DEVICE does not meet the criteria for a vaccine, but falls into the category of gene therapy or medical device.

The approval only applies if there is no other approved medicine or treatment such as HCQ.

Irreversible unapproved gene treatment, - mRNA vaccination of the world's population is carried out 2021.

The greatest medical experiment tested on humans ever before and without animal clinical trials.

mRNA vaccines cause Autoimmune Disease. There is no off button for autoimmune priming.

Alert! Autoimmune Pathogen Priming can cause antibody dependent enhancement: a kill switch cytokine storm (CSS). Taking the mRNA vaccine you become a GMO.

A modern vaccine is protected by multiple levels of Intellectual Property (IP) and has full legal immunity.

Moderna: Our Operating System

"Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that functions very much like an operating system on a computer. It is designed so that it can plug and play interchangeably with different programs. In our case, the "program" or "app" is our mRNA drug - the unique mRNA sequence that codes for a protein."

PETITION, December 1, 2020

Petition for a stay of action to suspend phase III of the clinical trials for Pfizer/BioNTech vaccine and all other clinical trials.

They site "significant" safety concerns and request all trials are halted until specific criteria outlined in their stay action is met which will ensure efficiency and safety. **It's not only possible the vaccine could provoke serious unwanted antibody and immune reactions, but it must be "absolutely ruled out" that the vaccine would not render women infertile by disrupting their placentas, should they become pregnant.**

Conclusions

While small benefits cannot be excluded, we do not find significant benefits on case growth of more restrictive NPIs. Similar reductions in case growth may be achievable with less-restrictive interventions.

Hyper-immune response in test animals for previous attempts at coronavirus vaccines, like SARS and MERS, has been a persistent problem. All is well for a while, until the animals are exposed to the wild mutated virus. Dr. Tenpenny and other scientists have forecast that millions may die, and it will be blamed on a new strain of COVID, making an argument for even more deadly vaccines. In Mexico City, you will be treated with Ivermectin. As of Dec 29, this long-established drug has been used in COVID-positive patients, and soon thereafter death rates started to plummet, as the graphic shows. By Jan 22, about 50,000 doses had been delivered.

How Much Evidence Do We Need for Early Treatment?

Film-maker Leo Klein asks this question in a compendium of brief video clips by physicians and researchers discussing ivermectin and hydroxychloroquine (<https://tinyurl.com/y97v6umf>).

In 40 ivermectin studies, 100% show positive effects, with 87% improvement when used early ($p = .00052$). For HCQ, the probability that an ineffective treatment would generate results as positive as in the 172 trials to date is $<1/1015$ (hqcmeta.com).

Docs 4 Open Debate Open letter from medical doctors and health professionals to all Belgian authorities and all Belgian media.

We, medical doctors and health professionals, would like to express our serious concern about the evolution of the situation in recent months surrounding the outbreak of the SARS-CoV-2 virus. We call on politicians to be independently and critically informed in the decision-making process and in the compulsory implementation of corona-measures. We ask for an open debate, where all experts are represented without any form of censorship. After the initial panic surrounding covid-19, the objective facts now show a completely different picture – there is no medical justification for any emergency policy anymore. The current crisis management has become totally disproportionate and causes more damage than it does any good. We call for an end to all measures and ask for an immediate restoration of our normal democratic governance and legal structures and of all our civil liberties.
